### EXPERTISE

---

Linux

Jenkins

Terraform

Kubernetes

Python

GoLang

### EDUCATION

---

Majored in Computer  
Engineering - University of La  
Laguna

### CERTIFICATIONS

---

AWS - Cloud Practitioner

Hey there! My name is Andrés and I work as Team Lead - Sr Infrastructure Engineer at ICEYE. I don't like repetitive task so I automate them (with Bash/Python scripting or GitLab/Jenkins Pipelines usually), this way I can think about how to do well the important stuff.

In my free time I enjoy diving, hiking, reading some book or just playing videogames. I think that jokes and memes bring people together.

### EXPERIENCE

#### ICEYE

Team Lead - Sr Infrastructure Engineer - 2024 - Present

Lead Infrastructure Platform team. Cloud deployments automation using Terraform, Kubernetes on AWS.  
CI/CD with GitHub Actions/FluxCD.

#### ICEYE

Sr Infrastructure Engineer - 2023 - 2024

Cloud deployments automation using Terraform, Kubernetes on AWS.  
CI/CD with GitHub Actions/FluxCD.

#### DEVO

Sr DevOps Engineer - 2022 - 2023

Cloud deployments automation using Terraform, Ansible, Kubernetes on multiple clouds.  
CI/CD with Jenkins/GitLab CI/ArgoCD.

#### XaIDigital

Team Leader - 2022

Multiple team/projects management including client-facing experience.  
Cloud architecture design.  
Cloud deployments automation using Terraform, CloudFormation.

#### XaIDigital

Automation Engineer - 2020 - 2022

Cloud deployments automation using Terraform.  
CI/CD with Jenkins/GitLab CI.  
Big Data projects using AWS and Spark.  
Serverless projects on AWS.

#### System73

DevOps Engineer - 2017 - 2020

Microservices deployment on Docker to the cloud (AWS).  
CI/CD and automation with Jenkins Pipelines.  
Tools/microservices development with Typescript, Python, Go.

#### Arte Consultores

System Administrator - 2016 - 2017

Virtual machines management on ESXi.

Installation and management of Continuous Integration environments (GitLab, Jenkins, SonarQube, Nexus).

Deployment environments management (Tomcat, Apache2).

Scripting with Bash and Python.

Help in some Java/Angular2 projects.
